

## Cara Hudson - Niagara Falls

I, Cara Hudson, want to testify about rights, civil and human rights, of people in Western New York, even those on Social Security, diagnosed with a chemical imbalance or mental health illness, with the RIGHTS TO WORK. And also find supportive counselors that are willing to accept Medicare. I myself, have been harassed and discriminated against on the job in western New York for over 20 years now. I don't give up trying to work, but this government just keeps making it harder. This last job that I was going to be working as an auto parts delivery driver. The second day on the job, the driver dispatcher named Trina, said to me, DONT WORRY, I WONT HAVE YOUR BACK. The man training me in driving, named Jim, said to me, Trina is going to bowl you down. The third day there, Trina said to me, YOU HAVE A.D.D. The fourth day there, someone went in my purse and took every single pen OUT OF MY PURSE that you need to right down on auto parts delivery forms. The dispatcher Trina wasnt writing my name up on the board even as a driver, i asked her why? She did not respond. This is DEPLORABLE. The manager Mitch did not even respond to my messages of what this dispatcher was doing to harass and discriminate against me. The human resources manager of Auto Parts International, did not even respond to my phone calls.
